

# THE UNIVERSITY OF WISCONSIN-MADISON ION BEAM LABORATORY IS HIRING AN INSTRUMENTATION TECHNOLOGIST

The UW Ion Beam Laboratory (IBL), a Department of Energy Nuclear Science User Facility, is seeking a **hard working instrumentation technologist with expertise working in accelerator environment**, and responsibilities such as:

- **Work closely with research staff and users** for startup, run, and shutdown operations of the accelerator
- **Support the design** of complex and innovative ion beam experiments
- **Assist in the development of the processes** around routine and non-routine accelerator operations and maintenance tasks

Join our multidisciplinary team to work on innovative and unique ion beam experiments based around the UW-IBL ion accelerator capabilities, to provide support for operational and testing activities, and to be part of exciting cutting-edge research program!

Required:

- Bachelor's Degree
- > 1 year experience working in an accelerator environment

To apply, contact Prof. Adrien Couet at [couet@wisc.edu](mailto:couet@wisc.edu) or go to: <https://jobs.hr.wisc.edu/en-us/job/514330/instrumentation-tech>
